

**CAPE
BORDEAUX
RED BLEND
REPORT
2017**

KEY FINDINGS

Why have Bordeaux-style red blends become such a fundamental part of the South African fine wine scene? Originally, the reason they were made must have been as an attempt to gain some of the respect afforded to the classed growths of the famous French region but we now live in an time where we must stand or fall on our merits and the primary motivation for this category therefore becomes that if two or more grape varieties are to be combined, then the result should be more interesting than any of the components on their own.

And indeed the panel once again did notice that the best of these wines deliver a particularly satisfying drinking experience, less severe than is often the case with single-variety Cabernet Sauvignon and more nuanced than single-variety Merlot. More treble and bass, more light and shade in the end-result, if you will.

The corollary of this is that many of the less highly rated wines weren't necessarily of poor quality but rather just straightforward – the panel left with a sense that the end-wine wasn't much better than the individual components would've been to start with.

Genuinely characterful wines start with genuinely characterful grapes and the panel was happy to note that they were very few wines which showed over-ripe character. If anything, the opposite was in evidence with a few wines looking a bit thin and under-done. Efforts to achieve elegance are to be commended but the best wines tend to have real substance without appearing unduly sweet or alcoholic.

There were an array of vintages entered, the oldest being 2007 and 2015 which the panel found challenging – many of what turned out to be the 2012s and 2013s appeared overly advanced (both puzzling and alarming) while the 2015s on the other hand were difficult to judge on account of being excessively primary and unintegrated.

Unappealing pyrazine character, excessive acid additions and clumsy oaking were noted in a few instances but these are perennial bugbears. On the whole, this was a very good showing for the category with 25 out of the 60 wines rating 90-plus on the 100-point quality scale. There's plenty of experimentation going on in the South African winelands right now but it seems the Cape Bordeaux Red Blend will be with us a while yet.

JUDGING PROCEDURES

60 entries were received from 45 producers. The judging panel was chaired by myself and further consisted of two trusted colleagues, namely Roland Peens and James Pietersen, both of Wine Cellar, Cape Town merchants and cellarers of fine wine. We tasted blind, ratings done according to the 100-point system. Final scores were awarded on the basis of discussion that involved retasting where necessary rather than relying solely on arithmetic averaging.
