INTRODUCTION

Just how well do modern-era South African wines perform as they get older? One of the most important measures of great wine is that it should be age-worthy, that is it should become more pleasurable and more interesting to drink with time in the bottle and the annual 10 Year Old Wine Awards sets out to examine precisely this.

KEY FINDINGS

The 2008 vintage was considered a “challenging” season on account of rain and generally cooler conditions during harvest resulting in wines of variable quality and it appears producers were even less inclined to hold onto library stock than usual – this year’s tasting attracted 56 entries from 27 producers compared to 72 from 41 when the more highly regarded 2007 vintage was reviewed last year. Of the 56 entries, three were Méthode Cap Classique, 18 white wines, 32 reds, one Noble Late Harvest and two fortifieds.

So is 2008’s mediocre reputation justified? An argument could well be made that as an industry, our reaction to vintages is somewhat unconsidered – overly positive in the supposedly good years and overly negative in the bad – and the wines in this line-up were not nearly as inferior as might have been expected.

That said, the majority of the wines were merely holding up rather than having undergone some magical transformation but that’s perhaps as it always has been and always will be – time, in most instances, bringing a certain mellowness rather than real complexity and refinement.

There were, however, 15 wines to rate 90 points or more on the 100-point quality scale (five white wines, seven red wines, one Noble Late Harvest and two fortifieds) and here producers can feel justifiably proud of their efforts, in particular Neil Ellis with three wines and Tokara with four among the top performers. Mention must also be made of Remhoogte who famously employed the services of controversial super-consultant Michel Rolland during the 2000s – the Cab 2008 from this Stellenbosch property rated 91 while the Merlot 2008 and Pinotage both rated 89. Not a bad outcome at all!

When it came to the white wines, it was the six examples of Sauvignon Blanc that collectively impressed most of all – in the hands of serious producers, wines from this variety typically have the high acidities and low pHs necessary to go the distance.

As for the reds, the panel was struck by how many wines showed problematic acidities – disjointed, sour, tart. Acidification is, of course, legal in South Africa but it would appear that producers are doing it much more judiciously now than 10 years ago.

The other issue was wines that apparently had been made with the intention of capturing as much fruit power as possible – these often proved controversial with them possessing a compelling richness but this achieved at the expense of verve. Again, it would seem advances have been made with our general understanding of what constitutes “optimal ripeness” in the vineyard having evolved greatly in the last decade.

What did best overall? The two top wines of the tasting, each scoring 92 on the 100-point quality scale, were the Tokara Tokara Reserve Collection Noble Late Harvest 2008 and the Badsberg Red Muscadel 2008. SA's sweet wines. They don't get much love but they should.

JUDGING PROCEDURES

The judging panel was chaired by myself and further consisted of two trusted colleagues, namely Roland Peens and James Pietersen, both of Wine Cellar, Cape Town merchants and cellarers of fine wine. We tasted blind, ratings done according to the 100-point system. Final scores were awarded on the basis of discussion that involved retasting where necessary rather than relying solely on arithmetic averaging.
