ABOUT THE WINEMAG.CO.ZA TASTING PROGRAMME 2022

Winemag.co.za is set to produce a series of category reports over the course of the year with multinational financial services company Prescient as sponsor. Each report will be based on the outcome of a blind tasting of wines entered within a specific category.

A report includes key findings, tasting notes for the top wines, buyer's guide and scores on the 100-point quality scale for all wines entered. Upon release, producers can purchase both Top 10 and regular rating stickers – consumers are encouraged to look out for these in the retail environment.

JUDGING PROCEDURES

The judging panel was chaired by me and further consisted of two trusted colleagues, namely Ndaba Dube, Food & Beverage Operations Manager at the President Hotel, Cape Town and Spencer Fondaumiere, chairman of the South African Sommelier Association.

We tasted blind, labels out of sight. Ratings were done according to the 100-point system, final scores awarded on the basis of discussion that involved retasting where necessary rather than relying solely on arithmetic averaging.

KEY FINDINGS

For this Sauvignon Blanc Report sponsored multinational financial services company Prescient, there were 94 entries from 71 producers with 47 (50%) rating 90-plus on the 100-point quality scale. In addition, there were 10 examples of single-variety Semillon and 18 Sauv-Sem blends entered.

In contrast with previous reports, the distinction between unwooded and wooded Sauvignon Blanc was dispensed with on the basis that an ever-increasing number of producers at the top-end are choosing to use some sort of alternative to stainless steel tank during fermentation and maturation, whether partially or entirely, to build complexity in the final wine.

The addition of Semillon as a tool to add an extra dimension to straight Sauvignon Blanc is also more and more commonplace. As mentioned above, there were 18 wines specifically labelled as blends (Sauvignon Blanc not necessarily the majority component) that were entered but out of the single-variety Top 10, three contain a portion of Semillon amounting to 15% or less as allowed by Wine and Spirit Board regulations.

Yes, Sauvignon Blanc has become ubiquitous on account of how readily it makes aromatic, crisp but ultimately unchallenging wines intended to have mass appeal and yes, these are probably not worth consideration by highly involved wine enthusiasts but to dismiss the variety out of hand is short-sighted as this Report reveals.

As ever, Sauvignon Blanc responds well to cooler climate conditions, whether this be due to vineyards being located close to the sea or at altitude - Constantia, Darling, Durbanville, the Cape South Coast plus certain locations in Stellenbosch all produced wines that showed well.

When it comes to winemaking, meanwhile, there is plenty of freethinking in evidence. The Diemersdal team, for instance, saw fit to employ spontaneous fermentation and four days of skin contact before maturation lasting 11 months in older oak when it came to Wildhorse Shoe 2021. Brad Paton of Buitenverwachting used a selection of five yeast strains in creating his 2022. And there's very little that's predictable or formulaic about the other top-performing wines.

Sauvignon Blanc, when sited correctly and then treated with both care and imagination in the cellar, is producing wines that are just as intense and complex as the best examples of Chardonnay or Chenin Blanc. In particular, the perennial criticism of Sauvignon Blanc that its acidity is too hard and aggressive is now invalidated by wines that have the fruit weight to provide balance. In addition, wines premised on having a very high pyrazine count (the chemical compounds that gives Sauvignon Blanc its "green" character and measured in nanograms per litre) to make an impression seem to be increasingly out of fashion. In their place are wines of far more nuance and detail.

Suffice to say, being a Sauvignon Blanc naysayer no longer identifies you as hip and unconventional but rather it's a sign of being dogmatically closed minded if not radically out of touch.

The average price of the 47 wines to rate 90-plus is R149 a bottle and of the Top 10 is R194. Offering the best quality relative to price is Robertson 2022 with a rating of 92 and selling for R65 a bottle.

Kershaw Wines, as producer of the Sauv-Sem blend judged best overall, wins a new 225-litre Sylvain Blanc barrel worth €941 (the equivalent of R16 075 at the time of writing) from Tonnellerie Sylvain.
